Garold M. Mutl Page 3

8. (As filed) A method as in claim 5, wherein the connector has a through hole such that fluids passing through the traveling valve move through the through hole and upwardly through the plunger.

a pump barrel that is adapted to be placed into a well casing;

9. (New) A pumping system comprising:

a plunger reciprocatably positioned within the pump barrel, wherein the plunger has an open top end that is configured to direct particulate away from the pump barrel, a bottom end, and a traveling valve at the bottom end, wherein the plunger has a tight fit with the pump barrel to prevent particulate from accumulating between the plunger and the pump barrel;

a connector coupled to the plunger below the top end; and a rod coupled to the connector, wherein the rod is translatable to reciprocate the

plunger within the pump barrel using an upstroke and a downstroke.

REMARKS

Claims 1 and 5 have been amended. Claims 9 has been added. Examination of the claims, as amended, is respectfully requested.

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 303-571-4000.

Respectfully submitted,

Darin J. Gibby Reg. No. 38,464
